Russell Lindsay Nichol

A REAL PIONEER PASSES

Crossfield and District suffered quite a shock on Monday evening when word passed around that Russell Lindsay (Russ) Nichol had suddenly passed away while reading his paper after his evening meal. He had been around as usual during the day although not feeling the best.

Russ, while of a quiet nature, was a friend to everyone and always a willing community worker.

Born in Winnipeg 61 years ago, he first moved to Alberta in 1896 settling in Innisfail. Later he moved to Slocan City and Nakusp, B. C. but returned to Threecroft in 1907. In 1917 he moved to Trochu and came to Crossfield in 1927 where he had charge of the Western Canada Elevator until a few years ago. For the last two years he has been night watchman for the Village of Crossfield.

Mr. Nichol served several years on the Village Council where his wise council and sound judgement carried the Village over many a rough road.

Married on October 23 1905 to Miss Marie Lamoureux of Fort Saskatchewan, he is survived by his widow and son Lawrence of Crossfield, two sisters, Mrs. M. Cameron of Slocan City B. C. and Mrs. Jack Dill of Vancouver B. C. and two brothers George of Slocan City and Dan of Pouc Coupe.

The funeral service will be held from the United Church in Crossfield on Friday afternoon at 2.30. Interment in the Crossfield Cemetery. Rev. E. Longmire will officiate. Armstrong Funeral Home will be in charge of the service.

Tunis S. Ferguson

Another pioneer in the person of Tunis Snook Ferguson of the Carstairs District passed away at his home on Wednesday evening.

Mr. Ferguson with his family came west in 1901 and has resided on a present farm ever since, earning the deepest respect of all who knew him.

Mr. Ferguson suffered a stroke about two years ago and while he really never got over it, he was able to sit up and visit with his many friends. Taking a turn for the worse on Wednesday morning he passed away early in the evening with his family all by his side.

The funeral will be held from the United Church in Carstairs on Saturday afternoon at 2.30. Rev. E. Longmire and Rev. Rogers will conduct the service.

Fall Rush Over

The long open fall, one of the best in years, resulted in the threshing and fall work being pretty well cleaned up. Only a few machines have yet to do ranging from a few hours to a few days.

A large portion of the wheat has been delivered and reports indicate that nearly all of it is being sold to the Canada Wheat Board. With a guaranteed price a few cents a bushel above the open market and the right to share in any surplus at the end of the year makes the farmers decision very simple.

The rush of deliveries being over for this year the boys on elevator row have hung up their lanterns and can take time to carry over their own meals instead of getting them delivered "a la can".

Mrs. P. I. McAnally and Mrs. A. Smith were Calgarians visitors on Saturday last.

Geo. W. Motter and his chauffeur were looking after business interests in the district last Monday.

Mrs. Gunsolus of Carsland spent the week-end visiting friends in the Crossfield district.

Rev. E. Longmire in distributing the vegetables contributed last week found them very greatly appreciated and states many more could be used.

"Play the Game"

For over five years now we have experienced about the hardest times in a financial way that Alberta has ever witnessed. Peoples savings were used up and their credit exhausted. Loans were next to impossible. But people had to live and to do so it was necessary to have credit. Then, rightly or wrongly, the merchant, garageman, blacksmith, or others gave that much needed assistance. There is no doubt this was very poor business practice but it certainly permitted the farmer and others to live.

Last year this district had a fair crop, better than Alberta's average, and the price was fair. This year, considering all circumstances, this district has enjoyed a better than average crop and the pegged price gives a fairly good return.

Under these circumstances it is the opinion of the Chronicle that every man or woman who has had the assistance of these business men during their trying period, should reciprocate now by taking a proportionate share of their first returns to their "main supporters", those men who pledged their all to help.

"If it's playing baseball

Or if it's just a living

Or if you are receiving

Or if just merely giving"

"Play the game"

John Zanni a Winner

John Zanni was the divisional first prize winner for the best old garden viewed from the track. This contest is conducted yearly by the C. P. R. Congratulations Jack both on your garden and the winning of the fifty bucks.

We Miss R. B.

The boys kind of missed our own "R. B." along Broadway on election day. No doubt he was in the corner store at Avonmore, sitting on the counter with his feet on the cracker barrel telling the boys all about it.

No doubt his election stories were interspersed with some wild west ones about the "deep wells" he has sunk or the large "bull" moose he shot (at Adam's).

False Alarm at 6 a.m.

Thomas Smeaton and the threshing crew on his place had quite a scare about 6 a. m. Friday, when a fire was sighted at Jim Metheral's. The whole crew rushed over to assist only to find "Jim" burning his potato tops. Fire departments received many false alarms.

Over 350,000 Bushels of Wheat Marketed Here

Over 350,000 bushels of wheat have been delivered so far this year either to the elevators or over the loading platform and on Monday 153 cars had been shipped out.

Grain has been moving so fast that the terminals are practically full as well as many country elevators and we understand an embargo against further shipments has been placed in effect on certain points.

P. H. Swanson Bereaved

P. H. Swanson of Cochrane received word last weekend that his father and oldest brother, who reside in Nebraska, had met with a serious auto accident and very little hope was held out for either of them. Paul left immediately by car, driving as fast as Great Falls, Montana, taking a fast train from there to S. Dakota and the balance of the way by car. FLASH! We have just received word that Mr. Swanson's father had passed away.

Guest Speaker at Calgary

R. M. McCool addressed the Current Events Section of the Canadian Club at a luncheon held in the Club Cafe, Calgary, on Wednesday, his subject being "The True Position of Alberta's Finances".

Recreation A Vital Necessity

Ever since some authority discovered and told the world that every man should have a hobby, the dictum has been reiterated at intervals by later authorities with varying degrees of emphasis and sometimes by those who are interested in promoting some form of amusement or recreation.

Whether uttered, however, with or without an ulterior motive the assertion is one which has a sound foundation in psychology and human experience. It is first cousin and as well founded as that more popularly known saying: "All work and no play makes Jack a dull boy."

While a hobby or recreation is a valuable adjunct to work for man at all periods of his march from the cradle to the grave, in at least two stages of his progress, in youth and in old age, it is an absolute essential if he is to achieve the goal of life—happiness.

The word recreation itself gives a clue to the reason. Re-creation, the making over of the individual as he seeks relaxation from the "trivial round and common task" means what it indicates.

Unless a man is content to be a dull clod, he must refresh and re-create himself by seeking relaxation in some pursuit which, for the time, will lift him above the cares and worries incidental to earning his daily bread and providing for the needs of those dependent upon him. He needs some interest, which will infuse rest into aching limbs or brush away the cobwebs from the brain.

In youth this diverse interest may take the form of athletics, mechanical activity and with, in majority, some more sedentary type of relaxation, but no matter what form it may take, it is essential to the development of a sound, robust citizenship, that youth should be allowed time for recreation.

The lad or young man without a hobby is apt to become morbid and unhealthily introspective. Youth is normally a period of superabundant energy and this overflowing vivacity should be allowed to express itself in forms of healthy recreation, and if it can be used as a step ladder to a life vocation, it is that much more to the good.

Many a youth has "found" himself in the pursuit of a hobby. History is full of stories of boys and young men who have made good in later life because they have been allowed to follow their bent and of many more who have done so despite overwhelming obstacles and discouragements. By all means encourage the young man to take up some interest, apart from his daily work and chores.

And if a hobby is essential to youth it is vital to old age. There is no more pitiful sight than the old man whose physical powers have waned and who has no interest in life or in living. Such a man is a burden to himself and an incubus to his associates. He is misery personified and makes miserable those with whom he comes in daily contact.

But the old man who has built up an interest secondary to the life work which he pursued in his prime is spared these pains and penalties of advancing years. As he becomes physically unfeeling he is able to turn his mind to his hobby and find in it daily pleasure. And this is all that can be taken for granted, that the hobby which he has developed is something which he likes and in which, therefore, he can excel. Such a pursuit will go far towards prolonging life itself and will certainly give zest to the declining years. Gloom will give way to sunshine and contentment will dispel moroseness.

But it is too late for the aged to develop a hobby after they have reached the sere and yellow. The old adage, "You can't teach an old dog new tricks" is applicable to humanity. There may be exceptions but that is the rule. That is one of the reasons why, even during the crowded years of prime and middle life, a recreation is not only advisable but essential. It is an insurance policy for a contented and interesting old age.

Moreover the man who diversifies his interests beyond his life's vocation, even during the period when life is at the full, is more likely to have an old age in which to further develop his hobby. It need not necessarily be something apart from his daily work. It may well be something related to it, in which event its pursuit will yield additional interest and perhaps more tangible dividends in the task of making a living.

Building Up Air Force

Chinese Dancers Are Willing To Help Aviation League

Dancers are to do their bit in helping China get together a strong air force. This is a result of a request by the China Aviation League to the proprietors of Chinese dance halls in Shanghai for a charge of five cents on every dollar earned in their establishments to go towards a fund for the purchase of airplanes. The dance hall owners will pass the five cents charge on to the Chinese. The proposal has been accepted by 20 dance halls and others are expected to notify the Aviation League of the compliance before many dance-nights have passed.

Berlin cleans its streets of oil dropped by motor vehicles by shooting jets of live steam, generated by portable boilers, over the surface.

The use of bright colors at Easter time is symbolic of the rays of the aurora and the dawning hues of the Easter sun.

First Bicycle In Bavaria

Built In 1864 It Is Made Entirely Of Wood

Bavaria's first bicycle, built by the famous German sports instructor, Johann Friedrich Trefz, has been discovered by the Deutsches Museum at Munich. The bicycle is made entirely of wood, and was designed and built by Trefz in 1864. Peasants, when they first saw him pedaling the wooden machine along the road around Munich, shouted "witch-doctor!" and often threw stones and crossed themselves. Trefz only managed to overcome Bavarian prejudice after he had built an indoor bicycling hall in Stuttgart to "introduce Germans to the bicycle."

Compiling Jewish Dictionary
Will Be First One Ever Prepared For Publication

Declared to be the first dictionary of the Jewish language ever compiled, a work is being prepared for publication by the Institute of Jewish Proletarian Culture of the White Russian Academy of Sciences, according to a report from Moscow. It will be issued in three volumes. The White Russian State Publishing House is also preparing to publish Jewish translations of the world's literary classics. Among the first to appear will be Shakespeare's "Othello" and "Romeo and Juliet" and Schiller's "William Tell."

The last sailing ship built in Great Britain was the Archibald Russell, which was built in Glasgow in 1905.

Heading the best sellers among Braille books published by the National Institute for the Blind in Great Britain are the Bible and an Edgar Wallace novel.

Assistance Will Be Given

Alberta Government To Help Exhibitors At Winter Fairs

Alberta Government will once again assist seed grain exhibitors at the Toronto Royal Fair and Chicago International this fall. For the Royal Fair, entry fee and shipping costs to Toronto will be paid on boys' and girls' club exhibits. Return shipping costs will be paid.

At Chicago International Hay and Grain Show, where Alberta has made such an outstanding record in seed grains for the past 15 years, the government will pay shipping costs on approved exhibits. Prize money in the regular grain sections at Chicago was won by Alberta exhibitors will be duplicated by the provincial government. In the 1934 competition, first prizes or championships being taken, a special sum of \$500 will be granted, which will be increased to \$100 in the case of championships in wheat, oats or barley. The provincial wheat bracket will as far as possible supervise the arrangements for the exhibits.

Still In The Lead

No Book So Widely Read As The Bible

The Bible of the present generation is the outcome of centuries of research and patient effort. It contains 66 books in one, covering history, psalms, prophecy, romance, law, liturgy, biography, and letters, received as correspondence. Men like King George read a part of every day for guidance and encouragement in their lives. Sun Yat Sen, Chinese follower of Confucius, Mahatma Gandhi the Hindu, and Kawaga of Japan, pore over it and were moved to their destinies by its teaching. It is read in palaces and in mud huts. Each year the Bible societies of the world send out 25,000,000 copies in hundreds of languages. In spite of supposed religious indifference it is the most read book in the world—St. Thomas Times-Journal.

Receive Cordial Welcome

Employees Of Bessborough Estate Glad Family Is Home

The Earl and Countess of Bessborough and their family received a cordial welcome from employees of their estate when they returned to their home, Stansted Park, Hampshire, England.

The earl has just completed his term as governor-general of Canada.

Flags of the Bessborough's corps passed beneath an archway of foliage bearing the words "welcome." An address of welcome was presented.

Parents and children from the estate were entertained at tea and a bonfire concluded the celebrations.

Cheat Grass New Menace

Range Pastures In Kamloops Area Show Growth Of Weed

A warning is given by Dr. S. E. Clarke, of the Range Experiment Station at Manyberries, Alta., of the spread of cheat grass which has proved to be a troublesome weed in Montana. It has been found in range pastures in the Kamloops area. At other points it appears in waste places and along railway tracks. In appearance it resembles swarthy oats.

Brings Back Heavy Mail

M. MacLean, of the Post Office Department at Ottawa, is from the Arctic with a mailbag almost as big as Santa Claus'. Mr. MacLean went north with the Government's annual Arctic expedition to inspect far northern post offices. He brought back 13,000 letters sent north by Philatelists to be stamped by Royal Canadian Mounted Police officers at post offices on the roof of the world.

Creep Worth Half Million

Growers estimate the 1935 crop of hops in the Fraser Valley at 1,700,000 pounds, a value of a half million dollars. This represents an increase of 300,000 pounds over 1934. Some 2,000 pickers were employed in harvesting the crop.

The last sailing ship built in Great Britain was the Archibald Russell, which was built in Glasgow in 1905.

Customer—"Are those eggs strictly fresh?"
Grocer (to his clerk)—"Feel of those eggs, George, and see if they're cool enough to sell yet."

25

No trouble. Very healing!

MINARD'S
"KING OF PAIN"
LINIMENT

Now Science Explains Why So Many People

Past 40

Feel That They're Slipping Losing Their "Grip" on Things

Many people "round 40 think they're "growing old." They feel tired a lot, "weak." Have headaches, dizziness, stomach upsets.

What scientists say is the cause of all this in great majority cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the acid.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed.

To this soon you'll feel like another person. Take either the famous liqueur "PHILLIPS'" or the convenient new "tablets" of Milk of Magnesia Tablets, Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores. One tablet is equivalent to a teaspoonful of the famous Phillips' Milk of Magnesia.

PHILLIPS'
Milk of Magnesia

"PRIDE OF MEXICO"

Mounted Section Necessary

Separate Division Of R.C.M.P. Is Being Considered

The Mounted Police are considering forming a mounted section in the force, according to the annual report released at Regina headquarters.

If present plans are advanced to completion, the report states, "the subjects of equitation, mounted drill and stable management will be undertaken by those assigned to the mounted section only."

The report states difficulty is experienced in completing the training of some recruits within the prescribed period of six months when intensive training in equitation is included in the syllabus.

So some recruits may be assigned to mounted duty only, while others will take instruction in more modern and rapid methods of training.

Despite reports that the force was slowly and surely doing away with horses, Major-General Sir James H. MacBrien, commissioner, states in the report that "there is no intention whatever of dispensing altogether with the mounted man. A well-trained mounted unit of sufficient number is invaluable to any force which may have to deal with unruly crowds."

At the present time, the report states, the force throughout the Dominion has 238 saddle horses and 19 team horses, and of these, 88 saddle horses and 13 team horses are located in Saskatchewan.

Other means of land transport owned by the Mounted Police are 411 passenger cars; 34 motorcyles; 19 motor trucks; three railway gas cars and 413 sled dogs.

Of that number, there are 96 motor cars, four ambulances and 28 dogs stabled in Saskatchewan.

The force also operates 11 cruisers and eight patrol boats in preventive services on the eastern and western coasts.

Might Spoil Their Appearance

Army Troopers Prefer Jail To Having Hair Cut

Troopers of the Czechoslovakian army went on strike recently to escape the great peril of having their hair cut. About 40 of the men stationed at Olomouc flatly refused to obey their commanding officer when he ordered them to report to the barbers for a trimming. They clung to their determination not to have their hair cut and were sent to cells. Their reason, they said, was that they were about to be discharged from the army and would have to look for work. Everyone knows a lot in getting a job they pleased, but who can look really smart with one's hair cut like a convict's?

Experiment A Success

British Eggs Dispatched By Air Hatched In Australia

An experiment in sending British eggs by air mail to Australia, to be hatched by Australian hens, has proved a great success, two sturdy Rhode Island chicks hatched unknown in Australia, says Mr. F. P. Phillips, assistant secretary of the Poultry Club of New South Wales, received two settings of Rhode Island Red eggs by air mail. They were despatched fifteen days earlier by Lord Greenway from his farm at Stanbridge Earls, Romsey (Hampshire). The two chicks hatched out 23 days after receipt.

Ideas For Poultrymen

Chickens May Be Tattooed With Brand Of Owner

Chickens, tattooed on the wing, may soon become the present-day counterpart of the flask-branded cattle and horses of the old west, and for the same reason—to foil thieves. A system of identification, endorsed by the Northeastern Poultry Producers' Association is based on need-punctures made in the skin-web of chickens' wings and then filled with indelible ink. Each poultry-raiser has his own "brand," which is registered, and entered in identification books distributed to law-enforcement agencies.

Will Meet In Vancouver

Canadian Legion Convention To Be Held Early Next Year

The sixth convention of the Canadian Legion will be held early next year at Vancouver, a communication from Dominion headquarters of that organization said. The "veterans' parliament" will assemble late in February or early in March, but the hall has been left to the Dominion president, Brig.-General Alex Ross, of Yorkton, Sask.

Your Pipe Knows Ogden's Cut Plug

Must Have Good Method

TOKIO CLAIMS TO KNOW NUMBER OF FLIES SWATTED

In Tokio they have a way of counting the flies they swat. You know the word of Normi Ichigi, health prevention chief, that exactly 106,124,516 flies were swatted in Tokio in two days. He does not say who counts them or how, but he explains that the slain flies were packed in 175 large sacks. The champion fly-killer was a fish merchant, who felled 93,000 with deadly accuracy.

Negotiations for the laying of a telephone cable to cost \$3,500,000 are to be opened shortly between Denmark and the British General Post Office.

NOW TAKE HEALTH from LITTLE MANITO SPA

FAMOUS MINERAL SALTS BROUGHT TO YOU

Cariboo, Vichy and other resorts in Europe are famous for their mineral springs. Canada, too, has its Cariboo, for Little Manitou Lake in Sackashan is an amazing lake, with waters containing mineral salts of potent curative properties.

These powerful health-giving salts are extracted from the waters of the lake, cleaned and prepared, with the addition of Iodides, by expert chemists. They are then available to you in various forms, including a name for these medicinal Spa Salts of Sackashan.

Sackashan is a non-irritant salt highly over-acid in all silts arising from over-acidity of the blood.

Mineral Salts from Radium, Neutrit, Milk Stomach Salts, Kidney Elixirs and Troubles, Impure Blood, Skin Eruptions and Constipation, a short course of Sackashan will soon put you in the chorus singing its praises. If you are suffering from different health, one bottle of Sackashan will give you a new experience of what it feels like to be in real good health, and you think you already are in health, take a taste of Sackashan and then judge if your stomach, kidneys and bowels need the flushing and toning of Sackashan.

On sale at your druggist—enough for 10 weeks' treatment—60¢ a bottle.

Many Changes Brought About In Canada Through Motor Car Development

Canada's highways and motor cars present a striking illustration of changes brought about by progress and invention.

In the early days of settlement, roads were auxiliary to water routes as avenues of transportation. They were used during the summer season when portages were necessary to avoid obstacles to river and lake travel, and during the winters when ice prevented navigation. The growth of population and the demands for means of communication between settlement points soon made necessary the introduction of overland routes, and road construction in Canada got under way in the pioneer stages of the development of the country. Exclusive of the streets in cities, towns and incorporated villages, the total mileage of surfaced roads in Canada at the end of 1934 was 93,642, over half of which was in Ontario. The mileage of unimproved and improved earth roads was 315,627 miles, making a total of 409,269 miles of rural roads in Canada.

The automobile has played a most important part in Canada's road history, especially during the last twenty years in which the motor car has come to rank as a necessity of life to a large proportion of the population. The motor car made its advent in Ontario in 1904, when 535 vehicles were registered. In 1934, the meager number registrations in the Dominion as a whole grew by leaps and bounds until they reached the peak figure of 1,223,489 in 1930. The next three years showed a slight decline, but in 1934 the automobile again gained ground with registrations totalling 1,129,532 vehicles, a gain of 46,575 over 1933.

Canada has a wealth of highways and motor cars, and the extent to which the Canadian people now enjoy the educational and recreational values of travel reflect the new and higher standards of living which progress and invention have placed practically within reach of all.

Made Unlucky Catch

Torpedo Very Nearly Brought Disaster To Fishing Boat

A torpedo weighing several hundred pounds entangled in the net of the Hamburg fishing cutter Frieda, nearly brought disaster to ship, crew and cargo. The vessel put into Schubel Harbor near Hamburg with its deck almost burned away and its lifeboats destroyed by fire. The skipper, Captain Jonas, explained that the unlucky catch was made off Heligoland, and when the head of the torpedo was hauled on deck for some unknown reason it burst into fierce flames. The deck caught fire and even the glass of the wheelhouse melted. The wheelhouse, the mast and rigging were all destroyed. The terrific heat made it impossible to fight the flames at first, but the skipper made desperate efforts to keep the oil tank from exploding. Fortunately, the fire was extinguished before the engines were affected. The crew escaped injury.

China Has Ignorance Tax

People Who Cannot Read Or Write Must Pay

An ignorance tax is the latest form of taxation. After April 30, 1936, anyone on the city streets who cannot explain a simple lesson in the Chinese language will be liable to any policeman who questions him will have to pay a tax of one copper, the "ignorant people's tax," which is the backbone of the drive against illiteracy. More than half the citizens of Nanking can neither read nor write and the government has decided something must be done about it.

Must Be A Good Car

Lady Motorist Makes Long Trip In Old Automobile

From Mexico City to Montreal via the Pacific coast, about 5,200 miles, in 24 days, in a 12-year-old car with some 250,000 miles to its credit is the trip recently completed by Mrs. Charles Weber of Vancouver, who motored to Montreal to visit relatives.

Mrs. Weber has driven the same automobile five times across the continent and, about five years ago, drove it on a tour of European countries. She says it is still going strong.

"That Miss Smith can't tell a thing without exaggerating." "Did you ever ask her age?"

The Best Tank Heater

Wood-Burning Fireplace Under Galvanized-Iron Tank

After trying many ways of tempering drinking water for cattle and horses, the superintendent of the Beaverlodge Sub-station has decided that, for any situation where the fire hazard does not forbid it, the best system is a wood-burning fireplace under a galvanized-iron tank. The fireplace may be made of cement-concrete walls long enough and wide enough to support the metal tank in which the water is to be warmed. It is convenient to have the fireplace about three and one-half inches deep and to have a hinged door set at the side or end of it, with a forged-iron brick chimney at the opposite end. Do not stick a stove-pipe length in this chimney to increase the draft. It will invalidate the fire insurance on any building situated within 60 feet unless the fact is reported to the insurance company and a much higher premium paid. Many companies decline to insure a building where a metal chimney flue is used. The insurance agent raised no demur when the writer proposed a concrete fireplace with a brick chimney but warned against increasing the height by using a single length of stove pipe.

Flush with the top face of the wall, a few cross bars of iron may be embedded to support the bottom of the tank. It is also well to have a sheet or two of old iron underneath the metal tank to protect its bottom, and especially its seams, from the direct blaze of the fire beneath.

Draft may be improved and heat conserved by banking up earth against the fireplace door, and earth against the side from which the animals are to drink. Some protection may be provided even there.

Old fence posts, old poles or lumber, knotty wood or willow roots grubbed from the breaking make cheap fuel for such a fireplace and usually one or two fires a day will suffice.

Old Test Was Accurate

Grandma Knew How To Tell When Linen Was Linen

Grandma knew! When she wet into her index finger, thrust it into a fabric, and peered anxiously at the result, she wasn't just being nervous. She was utilizing what is still—even in this age of complex testing devices—one of the most effective ways for determining whether material is cotton or linen.

The finger test is effective. J. A. Nary, chief of the U. S. testing company's laboratory in the merchandise mart at Chicago, explained, because linen absorbs water more rapidly than cotton. Thus when water is placed on a mixture—cotton threads running one way, linen crosswise—it forms a oblong spot instead of the circular one characteristic of pure linen.

In all cotton the spot will be circular, too, but the water will remain on the surface a long time before being absorbed.

United States Butter

Government Official Does Not Expect That There Will Be Much Need For Importation

Secretary of Agriculture Wallace predicted there would be little importation of butter by the United States in the next year, says a dispatch from Washington.

"I am speaking on a percentage basis, of course," Wallace said. "You can talk about so many thousands of pounds coming in and make it sound imposing, but as a percentage of the total it won't be important."

The statement was his answer to a press conference inquiry as to whether he believed an increased tariff on butter, such as had been suggested by a New York group, would be justified.

Plan Has Proved Success

That the experiment of the Canadian railways in the introduction of their pick-up and delivery freight services has proved to be an unqualified success, this year's summer months shipments alone increasing more than eight million pounds per month over the same period of last year, was stated at the annual meeting of Canadian National Railways Agents Association.

A movement has been started to introduce Irish stew in Irish Free State hotels.

Amazons of Ethiopia

Rusted Wheat

Grain Board's Report Show 17 Per Cent. Graded As Rusted

Some indication of the damage caused by rust to western wheat is given in the report of the statistics branch of the board of grain commissioners on the movement of western Canadian grain for September. Approximately 17 per cent. is graded as "rusted." Improvement in exports of wheat is overshadowed.

The export movement of Canadian grain to overseas destinations has been slow indeed during the first two months of the crop year. There are, however, abundant indications of a substantial improvement developing.

Now that the movement from country points is in full swing, a better idea of the effect upon this year's crop of rust and unfavorable climatic conditions is obtainable. Using the inspection returns for the first nine days of October as a basis of calculation, 17 per cent. of bread wheats graded into the "special" (rusted) wheat grade and feed 14 per cent. graded number 5 and 6 and 48 per cent. 3 and 4th and better.

The heavy increase in the proportion of light-weight grain is reflected in the lower average weight per carload unloaded at the terminals, 1,474 bushels in September as compared with 1,518 bushels a year ago.

Winnipeg Building Program

New Hotel, Theatre And Fifteen Stores Are Proposed

Initial plans to give Winnipeg a new 12-storey hotel, a theatre, 15 stores and a bus terminal on a triangular piece of property in the business section of the city were laid before the civic public improvement commission.

Calling for a total expenditure of \$1,500,000, the scheme would be financed partly by United States capital and promoted by a group of Winnipeg business men. H. Moore, spokesman for the Winnipeg group, said it was "not a fly-by-night venture" and \$15,000 had already been spent on drawing the plans and preliminary study.

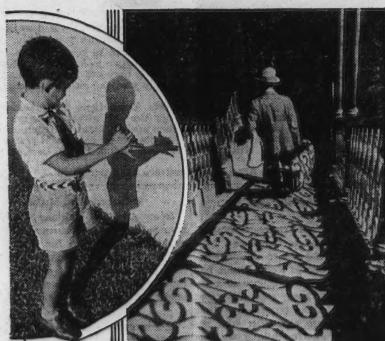

Could Not Be Done

A man presented two keys tied with string to a clerk at Leeds Post Office in England and asked for them to be forwarded with a telegram which he wished to send. He was surprised when he was told this was impossible. He said he understood money could be forwarded with a telegram.

Jazz was officially banned from radio programs throughout Germany. A government order said jazz was un-German and henceforth German dance music must replace it.

The SNAPSHOT GUILD

SHADOW SHOOTING

Experiment a little with shadow effects. You'll enjoy it.

Did you ever snap shadow pictures? If you haven't you have missed a lot of fun and failed to get the most out of your camera. But, believe me, it's fascinating pictures to add interest to your snapshot collection.

Shadow pictures are easy to make. The main requisite is a good strong sun in the late afternoon or early morning. Late afternoon, perhaps fifteen or twenty minutes before sunset, is the best time to make shadow pictures. The horizon is preferable for your light is usually stronger at this time and casts deeper and sharper shadows.

The two pictures above are only a few examples of the many unusual pictures to be taken with the aid of a strong sun. The picture to the right was the result of an experiment with a camera and a strong sun. As he started down the steps of an elevated train platform—with his always ready camera—says he, "Here is a picture." To make the picture he had to fill and shutter speed at 1/25 of a second—snap as the man at the bottom of the

Experts Of League Give Advice On How To Cure Crisis In World Trade

Geological Survey Work

Large Areas In West Are Found Favorable To Prospecting

Large areas of territory favorable to prospecting have been brought to light as a result of this season's geological survey work which sent 188 parties to the field in 85 projects financed by \$1,000,000 provided under the supplementary public works act.

The surveys found territory suitable to prospecting for gold and at least one promising silver area. Those geologists who have already returned from the field are busy preparing their reports which will be made available to prospectors next year.

Surveys in one area of the southwest territories revealed about 2,900 square miles of good prospecting ground for precious metal deposits and one occurrence showing free gold was staked by prospectors in the wake of one of the government parties.

One of the Manitoba projects reported it had mapped 200 square miles of favorable gold prospecting ground. Some prospecting areas were found in Northern Saskatchewan, while a British Columbia party found

"Physician, heal thyself!" Well might that mocking cry epitomize the advice of economic experts of the league on how to cure the crisis in world trade, says a report from Geneva.

Everywhere doctors—individuals and governments—are at work. They are employing purely national remedies for the disease. "The doctors have not yet been able to agree," a member of the international committee comments in tone of disappointed reproach, "and it has so far been impossible to attack the disease in the proper way—i.e., internationally."

"Accordingly, the malady from which the world is now suffering is no longer entirely the crisis but rather the inability of the countries to co-ordinate their several efforts to emerge from the crisis. This inability to emerge from the crisis is a result of the paralysis of the international circulation, the regular operation of which is indispensable to the welfare of the civilized nations."

The sixteenth assembly of the league, representing 54 nations, gave its blessing to free international trade. The secretary of state for the United States sent a telegram of approval. Recovery of trade, the assembly resolution held, would be assisted by the conclusion by as many countries as possible of international agreements having for their object the application of a more liberal economic policy. The resolution held further that the beneficial effects would be more widespread when based on the principle of the most-favored-nation clause. Agricultural experts are, in addition, to be consulted with a view to finding a world solution for agricultural depression.

And documents submitted present a revealing picture of a world where doctors went wrong. Two facts emerge. The first is the steady and very substantial recovery in raw material production and industrial activity. The second is the almost complete stagnation of international trade.

Canada To Gulf Shelter Belt

125 Miles Of Planting Finished In Six States

A start has been made on the great Canada-to-Gulf shelter belt about which so much has been said and written a year ago according to an announcement in the Forestry News Digest published by the American Tree Association, Washington, D.C.

Paul H. Roberts, acting director at Lincoln, Neb., says in the Digest that 123 miles of shelterbelt plantings have been completed in the six states traversed by the zone. An additional 5,117 acres of special tree plantings on 1,926 farms have been completed. This later planting was made in co-operation with farmers.

On the 649 acres of land now under lease for nursery purposes, seedling production is being rapidly completed, and a number of the species are up. Barring extreme weather conditions or unforeseen insect infestations, it is expected about 75,000,000 seedlings will be produced.

North Dakota, with 36 miles of strip plantings has the largest mileage. South Dakota with 28, and Kansas with 24, are close contenders. The mileage planted this year was very largely completed in the amount of suitable nursery stock available, both as to age and variety of trees.

Despite climatic conditions encountered throughout the shelterbelt zone, make it necessary to grow a variety of trees to meet this range of conditions. Each state must plant to meet its own particular needs.

Legend Of Navajo Indians

Mothers-in-Law Are Reincarnated As Bears After Death

Mothers-in-law are reincarnated as bears after they die. A 200-pound black bear became too troublesome, even for a mother-in-law, so M. E. Musgrave, director of the Mexican springs oil conservation project, shot the bear. Navajo squaws barred the doors of their hogans, sang hojini (good luck) songs and offered prayers to the bear's departed spirit. Indians who had touched the bear's carcass were really shaken down by quakes.

Sermon Was Appropriate

To avoid confusion when lights failed in the Central Baptist church at Saint John, N.E., during a hymn, Rev. Dr. Eric D. Knott immediately began his sermon. The subject was the five foolish virgins who neglected to have their lamps filled with oil. Their services ended in darkness.

Memorial Candle

Enrico Caruso's memorial candle, which was 16 feet high, five feet in circumference, and weighed one ton when first lighted, is burned one day each year—all Saints' Day—and will last 18 centuries, it is said.

John Van Guilder, a

fireman: "Why were you kissing my girl in a dark corner last night?" Seaman: "Now that I've seen her in the daylight, I wonder myself."

NO VOLUNTARY WHEAT POOLS TO BE OPERATED

Winnipeg.—With the long-sought Dominion wheat board in actual operation, no voluntary wheat pools will be operated by the Manitoba Pool Elevators Limited, this year, it was disclosed in the report of directors to the annual meeting of the pool of the grain dealers.

Since the action of dropping voluntary pools in favor of marketing by the Dominion wheat board will be taken by the Saskatchewan and Alberta wheat pools when the annual meetings are held shortly, said L. C. Broutelle, chairman of the central selling agency.

Increased handlings of wheat, increased membership and reduction of indebtedness of the pool to the Manitoba government were disclosed in reports to the 150 delegates from all parts of Manitoba. Payments to the government totalled \$177,722.42 and met the due instalment in full. An operating surplus of \$308,524.15 was reported.

Termination of the voluntary pools because of establishment of the Dominion wheat board was in line with the policy of the pool organizations, it was announced. The pool elevators will handle the grain and the marketing will be done by the Dominion wheat board.

The change was anticipated in agitation for the Dominion wheat board and the Manitoba pool delegates passed a resolution asking the board extend its jurisdiction "to handle coarse grains and to set a minimum price which approximates the cost of production." Such action can be taken by the board if approved by the governor-general in council.

Pool members will continue to have the alternative of delivering their wheat to pool elevators and either accepting the street price when delivery is made or selling through the board. The board will set a minimum price of \$24.60 per 2,800 miles of ice-bound mountain crags and snowy wastes will be to determine if possible whether Antarctica is one immense continent or two, divided by a channel from the Weddell sea to the Ross sea.

Enforcement Of Act Delayed

Premier Aberhart Gives Out Statement Regarding Health Insurance

Edmonton.—State health insurance will not be brought into effect for some time, it was announced by Premier Aberhart. The act, passed at the last session of the legislature, will still receive payments of basic dividends begin.

"One reason for not taking action now is that Social Credit means health benefits for the people," the premier said.

One objection was that under state health insurance there would be direct levies on people living in a unit organized under the plan.

As a result it is felt, he said, that the master should stand over until Social Credit is brought into operation, when there would be automatic health benefits for the people.

Big U.S. Deficit

Washington.—Uncle Sam dipped his pen in red ink, and reported his deficit had passed the \$24 billion mark for the present fiscal year. The United States treasury in a statement put the deficit at \$1,007,457,160 through Oct. 14. This compared with a deficit of \$87,211,671 on the comparable date of last year.

May Try State Medicine

Envied For Manitoba By Minister Of Health

Winnipeg.—State medicine throughout Manitoba, if an experiment about to be made in a small area proves successful, was envisaged here by Hon. I. E. Griffiths, provincial minister of health and public welfare.

Preparations now were being made by the government to establish a unit area in which a form of state medicine will be tried out, he said. The ultimate scheme would involve free medical, hospital and drug services to individuals, the cost to be borne "probably by provincial and municipal governments out of taxes."

In the unit area contemplated, said Mr. Griffiths, there would be no change in the present system except that doctors, diagnosticians and hospitals would not send bills to patients. Payment would be taken care of from a common fund provided by the municipal and provincial governments.

Explore Polar Sea

Wilkins And Ellsworth Expedition Leave For Antarctic

Montevideo, Uruguay.—The Norwegian whaling ship Wyatt Earp buzzed with activity as Lincoln Ellsworth and Sir Hubert Wilkins completed preparations to sail at once for their Antarctic expedition.

Accompanied by two Canadian aviators—Herbert Hollieken-Kenyon, of Winnipeg, and J. H. Lymburner, of Montreal—Ellsworth hopes to span Antarctica by air before Jan. 1 in the bow-winged monoplane "Polar Star" which has undergone intensive tests. It will be Ellsworth's third attempt to conquer the icy continent by air.

The objective of the flight across 2,800 miles of ice-bound mountain crags and snowy wastes will be to determine if possible whether Antarctica is one immense continent or two, divided by a channel from the Weddell sea to the Ross sea.

Powerful Radio Stations

U.S. Talk Of Installing Super-Powered Stations Near Canada

Washington.—A study aimed at re-aligning the United States radio system to provide from 20 to 40 super-powered stations and probably 150 new low-powered ones has been undertaken by engineers of the federal communications commission.

Plans under consideration are said to call for the establishment of high-powered stations on the Canadian and Mexican borders. These stations, however, would operate with directional antennae, throwing most of their power inland and away from the border stations of Canada and Mexico.

Ottawa.—Before any general plan was finalized finally by the United States which would involve the setting up in that country of super-powered radio stations, each 500,000 watts power, Canada and Mexico would be invited to confer with Washington on the proposals as it would involve probable interferences with broadcasting operations here and in Mexico. No invitation to such a conference has been received here.

Brazil Reduces Army

Finance Commission Anxious To Save On 1938 Budget

Rio De Janeiro.—Although virtually everyone—war and peace—is involved in the armaments, the financial commission on the chamber of deputies approved a slash in Brazil's standing army. The proposal would remove 3,000 men from the army, leaving it at 658,162, in an effort to save about \$300,000 in the 1938 budget.

CONFERENCE IN NOVEMBER IS CALLED BY KING

Ottawa.—It was learned here that Rt. Hon. Mackenzie King, in acknowledging congratulations received from Liberal provincial premiers, had expressed the hope they would seek to arrange their engagements as to make possible their presence at a Dominion-provincial conference in Ottawa on a date to be arranged in November.

He also sent a telegram to Premier Aberhart of Alberta advising him of the communication he had sent to the other premiers and asking if Mr. Aberhart also could so arrange his engagements as to enable him to be present at the conference.

(All the other provinces have Liberal premiers).

As soon as the new Liberal government assumed office, Mr. King said, it was his intention to discuss immediately with his colleagues the holding of a Dominion-provincial conference. The premiers would be advised of the decision.

Although Mr. King gave no indication as to the subjects proposed to be discussed by the conference, the impression here is that legislative enactments in the session will be decided in relation to their constitutional validity. Suggestions to amend the British North America Act may also be under review.

VISITS CANADA

Lord Rothermere, British newspaper magnate, who has arrived in Canada to spend a short vacation. He will spend the majority of his visit in Toronto.

Canadian Legion Anniversary

Celebration In November By Branches Throughout Dominion

Ottawa.—Arrangements are well advanced among branches throughout Canada for the celebration next month of the decennial anniversary of the founding of the Canadian Legion, J. R. Butler, general secretary, announced.

In connection with the birthday celebrations General Alex Ross, Dominion president of the legion, will undertake a tour of the country. He will be present at the Alberta provincial convention at Medicine Hat this month and will be in Winnipeg for the Armistice Day ceremonies, Nov. 11. Following that the general will tour Ontario, winding up in Ottawa on Nov. 25, when a public function celebrating the anniversary will be held.

Legion officials are hopeful the Lord Tweedsmuir, may be able to attend.

Canada Stands Committed

Ready To Carry Out Sanctions Imposed By League

Toronto.—Hon. Newton Rowell, Canada's delegate to the first assembly of the League of Nations, told the Canadian Club here, Canada stands committed to carry out all sanctions which the league might impose against Italy under article 19 of the league covenant. Canada must sever all commercial and financial relations with Italy should economic sanctions be imposed on that country.

Great Britain, he said, when Ethiopia's application for membership in the league was raised, and it was "only because of the advocacy of France and Italy" that Ethiopia was admitted to the league. There were no less than five treaties or agreements binding them to settle any disagreement by peaceful means.

Three balloons were released in Calgary last March when the experiments began and another trio were sent out on fact-finding missions in June. Four were found, one going as far east as the Alberta-Saskatchewan boundary.

When the balloon burst in the stratosphere, the radio link carries the instant message safely to the ground. The aluminum case is fixed between the kites and never touches the ground. Directions are attached to the kites asking that they be forwarded to the meteorological office at Toronto, where a reward will be paid for their return.

Series Of Earthquakes

Starts New River Running Near Afghanistan Border

Moscow.—A new series of earthquakes shook the district of Tadzhikistan, near the Afghanistan border, destroyed several villages and started a new river running from the mountains, said derelaps.

In all, there have been three series of quakes in the region, beginning October 8. The total dead was placed at 107 after the first two series and apparently the death toll was not great in the third disaster.

Uniform Text Books

Winnipeg.—Possibility of a joint education board being set up for the prairie provinces, with the objective of having uniform text books in the west, will be explored by the Manitoba department of education. Departments of education in the other provinces will be asked for their views.

GENEVA PUTS MORE WEIGHT BEHIND LEAGUE

Geneva.—Geneva has put more weight behind the League of Nations sanctions against Italy. Its "general staff" of 52 nations adopted a resolution urging member states quickly to fulfill their "duty to take the necessary steps to enable them to carry out" their sanctions obligations.

Earlier, the heaviest artillery for economic sanctions—a "buy nothing from Italy" plan—was moved into committee discussion by Anthony Eden, British minister for league affairs. Eden observed with satisfaction that no open opposition was expressed to his proposal to prohibit importation of "all goods manufactured in Italy," although the economic sanctions committee has not as yet definitely committed it.

Once economic sanctions—a key products embargo and the "buy nothing from Italy" boycott—had been finally approved, the first phase of the league's sanctions drive will be ended.

From then on League of Nations sanctions activities will be confined to watching over the enforcement of measures adopted.

Paris.—After the League of Nations has acted upon Great Britain's proposal that a "buy nothing from Italy" campaign be adopted as a sanction, France and Britain, officials disclosed, plan to ask the United States whether it would support a world-wide embargo against Italian exports if the league should adopt such a sanction.

The two powers will seek to learn if the United States would restrict its railroads to aid the league.

Attitudes of other non-league powers, including Germany, Japan and Brazil, will be sought likewise, it was understood.

WAR MATERIALS RUSHED FORWARD TO AID ETHIOPIA

Zeila, British Somaliland.—Ethiopian commanders and their staffs are working at high tension day and night to complete plans to oppose invasion on a battleground of their own choosing, according to reports reaching here.

Cheered by Somali tribesmen, trucks carrying new rifles and cartridges for the Ethiopian army are passing daily through British Somaliland, en route to Jijiga and Harar.

More than 100,000 tons of supplies, shipped across the Red sea from Aden and landed by British vessels at Berbera, have been delivered safely across the frontier since Britain lifted the arms embargo against Ethiopia.

Had dry weather enabled Italian tanks to make a dash through the desert, this route from the coast would have been cut off and the emperor's costly purchases would have been useless. But continued rains have delayed the tanks and held up the Italian troops.

Rifles have been redistributed by the mule load to troops scattered in the highlands, where scenes of the wildest rejoicing followed their receipt. Hardy hill fighters who never saw a modern weapon before, acknowledge the precious gifts with kisses and go off waving them in the air.

Plan Welcome For Lord Tweedsmuir

Official Ceremony At Quebec On November 2

Ottawa.—The official ceremony of welcome to Canada will be extended to Lord Tweedsmuir at Quebec on Nov. 2 on his arrival on the Duchess of Richmond. It was announced. The ceremony at the ancient capital will include the swearing in of the new governor-general.

Suggestion was made the new Liberal cabinet of Rt. Hon. W. L. MacKenzie King, victorious at the polls, may be sworn in here by the administrator, Sir Lyman P. Duff, in the interim. While no official intimation was available, this was thought as a likelihood.

The usual course will be followed with the prime minister of the day with his ministers journeying to Quebec to welcome the new incumbent of Rideau Hall. Mr. King, with his colleagues, welcomed Lord Willingdon when he arrived at Quebec in 1926. Mr. Bennett and his ministers went to Halifax to greet Lord Bessborough on his arrival in 1931.

Social Credit Text Book

Premier Aberhart Would Enlighten The Young People

Edmonton.—Preparation of a Social Credit textbook to be placed in classrooms of Alberta schools, even if only as a supplementary reader, to enlighten the young people regarding "this great movement," was urged by Premier Aberhart in an address to Edmonton teachers here.

The teacher was welcome to the new premier, formerly a Calgary high school teacher, from the Alberta Teachers Association, tendered through 250 Edmonton members.

Importance of the teacher's place in the "new order" was stressed by Mr. Aberhart. He used them to break from the confines of classrooms if they hoped to gain the recognition that is theirs in dealing with the country's greatest asset—its young people.

Build Up Navy

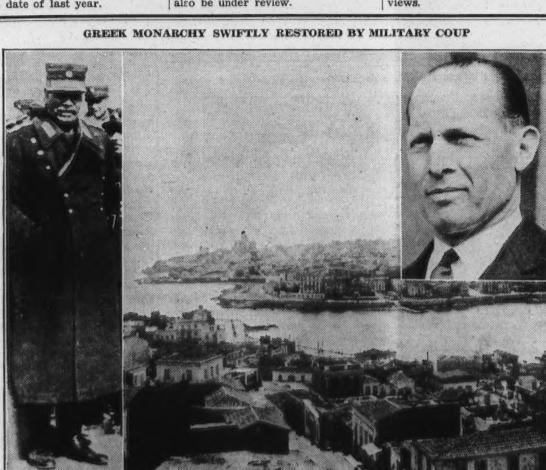

Earl Of Jellicoe Urges Start On More Capital Ships

London.—The Earl of Jellicoe, commander of the grand fleet during the first part of the Great War, urged an immediate start on the construction of capital ships for the navy.

Speaking at the Navy league's Trafalgar day dinner, he said: "Under present conditions the British empire does not possess the sea power vital for its existence. The obvious necessity is to start to build up our navy immediately to adequate strength."

Ban Is Modified

Toronto.—Horn tooting between 11 p.m. and 7 a.m. is to cease in Toronto "except when required to do so by law," it has been ruled by city council. The clause making exception for law requirements was inserted as an amendment before the bill was passed by the civic legislators.

In a swift Royalist coup d'état, Greece rejected her 11-year-old republic and restored the monarchy. It is understood that King George II will wait till he hears the result of the nationwide plebiscite which takes place on November 3rd before he returns to Athens. Above, left, is General George Kondylis, Royalist leader, who seized the reins of government in a swift and bloodless stroke. Centre is a picture of part of the harbor at Athens, while inset is a recent picture of the George, who, after eleven years exile in London was acclaimed King by the Greek National Assembly.

Boys' And Girls' Farm Work Contests

Elimination Contests Completed In Several Provinces

This has been a very active year for members of boys' and girls' farm clubs throughout Canada. In addition to the ordinary duties required under the various live stock, field crop, horticulture and home economics projects, club members have been in competitions of various kinds. The provision of special grants by the Dominion Department of Agriculture to Class A and Class B Fairs and to summer and winter shows for junior activities has afforded an opportunity for a great number of club members and other juniors to participate in competitive and educational programmes at a great many exhibitions.

With the approach of the Royal Winter Fair at Toronto, at which time the annual national club contests will be conducted, interest in provincial elimination contests for the selected clubs has been at a high pitch. The contests at Toronto will be held on November 19 next under the direction of the Canadian Council on Boys' and Girls' Club Work, and the competing club teams will be guests of the Council at Toronto for five days.

Thirty-two teams, of two members each, representing all of the provinces, are expected to participate in the contests at the Royal Winter Fair under six projects—dairy cattle, beef cattle, swine, poultry, seed grain and seed potatoes. Each team will have earned the right to compete at Toronto, first by having attained the highest standing in the local club and then by having won the provincial elimination contests.

At the time of writing elimination contests have been completed in Prince Edward Island, British Columbia, Nova Scotia and Quebec. Other eliminations will be completed during the latter part of October and early November.

The committee in charge of the club contests at the Royal Winter Fair met in September to plan the details of the contests. The committee members are: L. C. McQuat, General Agricultural Agent, Canadian Pacific Railway, chairman; L. C. Roy, Agricultural Agent, Canadian National Railways, and W. J. W. Lennox, District Seed Inspector, Seed Branch, Dominion Department of Agriculture, Toronto. From every part of Canada will be competition on the part of club members for the privilege of participating in the contests at the Royal Show in vident.

Delayed Parachute Jump

Physiologist Says It Is Like Falling Into Soft Down

The earthly experience most closely approximating a delayed parachute jump is "that of falling slowly into a great bed of softest down," according to Captain Harry G. Armstrong, head of the Physiological Research Laboratory of the Army Air Corps at Wright Field, Dayton, Ohio.

This is his description of his reaction to his own first parachute jump from an airplane at 2,200 feet. He fell for 1,200 feet before pulling the rip cord and opening his parachute. The jump was made to determine exactly the mental and physical reaction of a normal person during such a fall. His findings are incorporated in an article published in this month's Journal of the American Medical Association.

Captain Armstrong said that he experienced no nausea during the fall. His breathing was regular and undisturbed, his eyes unirritated, although he was falling at the rate of 120 miles an hour and wore no goggles.

He did not recognize that he was falling, he writes, until at the 1,900-foot level he suddenly noticed that the ground was rapidly approaching. No other sense indicated his fall, he said, being unaware of his falling while his eyes were closed.

Throughout his mental processes were entirely normal. Anticipatory fear and excitement passed immediately after he jumped. The one abnormality of sense was the absence of sound.

Mink Shipped By Plane

Three pairs of live mink were shipped by airplane to Frank Yasuda at Fairbanks by Charles Rudy, of Juneau, Alaska. The sleek, brown animals were moved in a special three-compartment crate, one pair to the compartment. They showed no ill effects from their ride.

"Your vacation problem doesn't bother you?"

"No; you see, my boss tells me when, and my wife where."

NEW GOVERNOR-GENERAL ATTENDS FAREWELL BANQUET

Lord Tweedsmuir, the new Governor-General of Canada, was the guest of honor of the Royal Empire Society in London at a farewell luncheon shortly before sailing for the Dominion to take over his duties. In the top picture Lord Tweedsmuir, centre, is talking to Admiral Sir W. Goodenough, Chairman of the Society, while the Hon. Robert Bingham, United States Ambassador sits on the left in the picture. Below, Lady Tweedsmuir sits next to the Earl of Athlone, Queen Mary's brother.

Revive Apple Trees

Use Of Boracic Acid Injected Into Trunk Found Beneficial

A "shot in the arm" will revive a drooping apple tree and put the blus back in the fruit, the department of agriculture has discovered. The shot is boracic acid, widely used household antiseptic, injected in the trunk with a brace and bit.

The department of agriculture conducted experiments in efforts to cure Kelowna, B.C., apples trees of such diseases as corky-core, dry rot and die-back, treating 40 trees in 1933 and 1934 with the result that they bore normal fruit and looked fine this year.

Officials cautioned, however, boracic acid injections might be necessary sometimes but it would be better to keep the patient in good health by more normal means.

Growing In Importance

Commercial Value Of Soya Bean Oil Is Increasing

Evidence of the growing commercial importance of soya bean oil is found in the fact that approximately one-sixth of the total yearly production of 37,200,000 pounds of soya oil was utilized for edible purposes, says the Scientific American. Refined soya oil, produced by modern methods, is a valuable source of vitamins A and D; a source in which vitamin D is not formed artificially at the expense of the vitamin A content.

Refined soya oil is used mostly as a substitute for salad oil, often blended with other oils. In this country it has recently found a new outlet in the mayonnaise industry.

Beasie—"Huh! And what did you get the prize for?"

Eddie—"For politeness, you simple idiot!"

Once Was Enough

Looking After Children Did Not Appeal To Father

This touching story is from the Housewife, the excellent little journal of the Housewife's Association of South Australia.

The mother of a family wanted to go shopping, and the father, a statistician, rather reluctantly gave up an afternoon's golf to look after the children.

When his wife returned he presented her with the following statement: Dried tears, 9 times; tied shoes, 13 times; toy balloons purchased, 3 per child; average life of balloon, 12 seconds; cleaned children not on crossing street, 21 times; insisted on crossing street, 21 times; number of Saturdays father will do this again, 0.

You Never Can Tell

Things That Look Like Failures Often Are A Success

Neal O'Hare, in New York Post says when the Broadway music firm of Shapiro-Bernstein brought out "Yes, We Have No Bananas" it was so skeptical of its success they published it under the name of the Skidmore Publishing Company, that its probable failure wouldn't affect the good name of Shapiro-Bernstein. The banana ditty became the smash hit of the decade. Similarly, when Simon & Schuster got out its original crossword puzzle book, they were so dubious of its ability to click they hid behind a subsidiary title, the Plaza Publishing Company. The crossword puzzle book promptly became a national rage and subsequent editions made more money for S. & S. than anything they ever published.

At the request of Hitler, a \$400 four-passenger automobile has been designed in Germany.

Once Considered Good Omen

Spilled Wine Bringing Bad Luck Is Modern Superstition

The superstition of bad luck from spilling wine on the tablecloth is a modern one.

It dates from the time tablecloths came into common use, and was evidently originated to keep the cloth free from wine spots. In pre-tablecloth days it was considered good luck.

A French writer shows that a century and a half ago in France it was considered a sign of coming good fortune to spill wine accidentally on the table.

The dishonest tavern keeper used to profit by it. He aided chance by upsetting the pitcher he served and then exclaimed: "Abundance! Abundance for you! Your fortune is made."

So he smilingly took the order for another jug, often many more in the hilarity of expected wealth.

Famous Southdown Flock

Sheep From King George's Estate Have Been Exported

The Southdown flock, King George's estate at Sandringham, hit the famous stock market establishment in 1866. In the past summer sixty-two head have been exported for breeding purposes.

Eleven sheep rams and ram lambs went to New Zealand, ten sheep rams and ten ewes to Canada, one sheepling ram and ten ewes to South Africa. An average price of \$120 was obtained for the rams.

Great Bear Route Closed

A full week in advance of last year, the open-water air route to Great Bear lake is closed for the present season. On a final dash for the far north, Pilots Stan McMillan and Marlowe Kennedy, of Mackenzie Air Service, were forced to return on Oct. 9 after covering only part of the distance in a blinding snowstorm.

THREE OF TORONTO'S STAR RUGBY PLAYERS

This picture, taken at a recent practice of the University of Toronto's rugby squad, shows three of the U. of T. stars. "Cam" Gray, left; Bob Coulter, centre, and Gus Greco, right. Gray, noted for having a remarkably accurate toe, is without a peer in Canada as a placement kicker and is a distinct scoring threat. He is one of the leading scorers in inter-collegiate football. Coulter needs no introduction, as his play at quarterback is one of the outstanding performances of the U. of T. team. Gus Greco, powerful middle wing star, is a great defensive player and would almost carry the ball through a brick wall.

Using Spare Time

People Who Keep Busy Are Always The Happiest

Some place around your house there is a bit of waste space. Six square feet is plenty. Perhaps it is one corner of the garage; maybe it is in the attic or the basement; perhaps it is in that hall bedroom.

Sometimes in your life there is a bit of waste time. Perhaps it is just after you get home from the office, and before dinner; perhaps it is in the evening when you don't care to go out for bridge or to see a movie. Perhaps you have a bit of gold and have your Sunday and Sunday afternoons free for relaxation.

If you could adjust your waste time to fit into that six square feet of waste space, you would be a much happier man. Inherent in the soul of every man is the desire to express himself in some other way than the routine solution of the bread and butter problem. Inherent in him is the desire to graft his creative instinct and leave behind him something of use to, or for the beautification of, the world. He would like to make something to which his grandchildren might point with pride.

Better than these incentives, however, is the happiness which comes from busy hands in creative work. Why not fit into that six feet of waste space a potter's wheel, a book binder's bench, a turning lathe, a jeweler's bench, a jig saw, an artist's easel, a cabinet maker's bench, a modeling stand, a printing press or a rug weaver's loom?

Too old to begin? Youngsters of sixty and more are beginning such things. There is no better relief from the loneliness of age than to begin avocation, and the pride of accomplishment is nothing compared with the joy we get from expressing ourselves in some creative way.

We can do anything we would like to do!—Kiwans Magazine.

Watcher Disobeyed Orders

Shot Fired At Bird May Have Started Ethiopia War

One shot, fired at a bird, may have started the war in Ethiopia.

This explanation of the U. of Ural clash last December, the incident that supposedly set in motion Italy's war preparations, was given by witnesses before an international committee of four at Geneva, the United States member, Dr. Pitman Benjamin Potter, revealed.

Dr. Potter, former political science professor at the University of Wisconsin, said the U. of Ural commission heard that 1,500 Ethiopian troops and 5,000 Italian native soldiers, in the unoccupied and disputed border fringe, had "starred at each other" for 10 days. They had some restlessness at a bird.

The shot, shattering tense nerves, plunged the forces into an all-night clash, which ended only when white Italian officers assumed charge, causing the Ethiopians to be routed with tank and airplane reinforcements.

The commission's decision that Ethiopia was not to blame for the incident, deprived Italy of her original complaint. Two Italian members, as well as a French member and Dr. Potter, concurred.

Dr. Potter said he believed Italy had good grounds for remedial action in Ethiopia, in the undefined border status and the fact that Italy could develop the country profitably for both, but declared that her methods were "entirely out of key with post-war procedure."

Tagging Wild Geese

Eskimos Up North Get A Biblical Picture From Jack Miner

If you shoot a goose up around Hudson Bay or in Baffin Land now, you get not only a goose dinner but Biblical pictures.

Jack Miner, naturalist, from his Kingville, Ont., bird sanctuary, tied tags to the legs of hundreds of geese this year before they migrated northward. He also sent a shipment of Biblical pictures to missionaries in the distant north. Eskimos and Indians shoot the birds, bringing the tags in to the missionaries and get pictures for them. Jack Miner also gets a check on the migration of the birds.

All Right Otherwise

A four-year-old boy was taken to a hospital in Pittsburgh for a tonsil operation. Here's what the doctors found: His heart is on the right side, instead of the left; his appendix is on the "wrong" side; his liver is on the left side instead of the right and his left kidney is on the right side and right one of the left.

"Well—" asked his wife.

"Nothing," Jack Miner sadly murmured.

"Didn't Hawkins pay you?" she persisted.

"Hawkins paid me?" he echoed.

"Why, he kicked me out with my own boots!"

"Money talks, I tell you."

"Yes, but it never gives itself away."

Economics In The Home

Checking Waste And Getting The Most From Materials On Hand

Two or three times on an income fair for the benefit of unemployed were debating fates and opportunities and discussing economics. Said one: "If Mrs. So-and-So had our monthly income, she'd save a nice little sum on it. She'd watch every copper and check every unnecessary outgo. But you and I, while we were taught never to waste, were never brought up to think every time we turned over a five-cent piece." "We've jolly well got to begin now to learn." Then they talked over economies practised by their model—a very enterprising woman, by the way. Never an orange nor a grapefruit skin is thrown away. All are dried and used as kindling in the grate. Potato, turnip, marrow skins are utilized in the garbage bin. Coal ashes are carefully sifted and fires banked with the siftings. Every atom of fat is saved, some for use in the model's own house, some given away; and when we say fat, we include chicken fat—gravy, butter for everything but pastry—and roast mutton or lamb dripping. Sheets are turned selvedge to selvedge the fine sign of wear in a bath or other towel is checked by a darn, brooms are hung up, vegetable water is saved for soups, strips of oilcloth are stitched to the edge of mats and rugs to save the wear that comes with turning; there is a daily survey of the refrigerator and constant supervision of kitchen utensils; things are put in the proper place, so that when a certain tool, for instance, is needed, there need not be waste of time hunting for it, and as too often happens, someone sent out hurriedly to buy another. The model's ways of managing are, in short, varied, but she always has enough and to spare for others.—Bride Broder in Toronto Mail and Empire.

Paid For Keeping Quiet

Tailor's Dummy Can Stand Without Moving For Three Hours

The world's easiest job, which consists of standing still, earns a living for the tailor in Prague. He earns his living by standing still and doing absolutely nothing. But it has cost him many hours of practice to reach his present proficiency. He can now stand for three whole hours in a shop window, or on a cart, being drawn through the streets without moving so much as an eyelash. Rudolf is a living tailor's dummy. He displays the latest styles in men's dress far better than any figure of wax could do, and his employers draw attention to their window by advertising a challenge: "Is the middle dummy living or was? Nobody is ever sure enough to take a substantial bet on it. Not even the most charming smiles directed at him through the window cause him any fear that he will blink—until his three hours are up. Then he relaxes. He is tired, but his "work" pays well.

Has Become Expert

Certificate Granted To Canada's First Woman Lifeguard Operator

Mrs. Hilda Publowski, stewardess of the Prince Rupert, a coastal steamship operated by the Canadian National Steamship Company, has passed the government's examination for a certificate to operate a lifeboat, and becomes Canada's first woman lifeguard operator.

Mrs. Publowski is a widow with two children. She is very popular and highly respected by the travelling public, and has been with the Canadian National boats for five years on the Alaska run.

The examination for the certificate calls for practical demonstration of performance including going down the side of the ship on a Jacob's ladder to the waiting lifeboat, stepping and rigging the mast and preparing for embarkation.

Added Insult To Injury

Wilkins, the owner of a boatshop, sold a lot of his wares on credit, and soon found that the money was not coming in as he expected.

"You'll have to call on them and demand cash," said his wife one day.

"Well—" asked his wife.

"Nothing," Wilkins sadly murmured.

"Hawkins paid you?" she persisted.

"Hawkins paid me?" he echoed.

"Why, he kicked me out with my own boots!"

"Money talks, I tell you."

"Yes, but it never gives itself away."

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches, or the pains of rheumatism, neuralgia or meningitis, your doctor should think about it—in comparison with "Aspirin."

We say this because, before the days of "Aspirin," many so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. But the use of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" in year and out without ill effect, have proved that the medical findings about its safety were wrong.

Remember this: "Aspirin" is rated among the *fastest methods* discovered for the relief of headaches and common pains . . . and safe for the average person.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

SYNOPSIS

Nancy Nelson is a sub-deb, a gray, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home with what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy sets out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her about. She comes along a road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's home. Matthew Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been sent to help out with the housework. Nancy is lonesome, and having no books to read, the idea of starting a small library comes to her. She goes to one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Alain painted a sign for the library, and the Adams boys worked on the shelves for the books and decorations to make the room look presentable.

Matt, Nancy, Matthew, and Adams go to the home of Matt's Uncle Tom, who is the uncle for the ride, and after Nancy and Jack leave home, they are caught in a blizzard. Blinded by the snow, they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a sand-drift gully. Their driver, a young wobblie, Jack, Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

New Go On With The Story

To Help You AVOID MANY COLDS

At the first nasal irritation or sniffle, apply Vicks Va-tro-nol—just a few drops up each nostril. Used in time, it helps prevent many colds entirely.

VICKS VA-TRO-NOL

CHAPTER XXI.

The days that followed etched new lines in Columbine Nelson's face, for only a few hours after her second telegram to Massachusetts, Jack took an unexpected turn for the worse.

"Shall I send for his people?" she questioned, when after a time that seemed endless a grave-eyed doctor emerged from the boy's room.

"I should wait," he answered. "If Jack were my own son, Miss Nelson, and I so far away, I should say the same. You see, if the end comes, it will be soon; and since his parents could not reach here in time to see him, it's not kind, and wiser too, not to harrow them with the knowledge of how dark the prospect looks now! If he lives through the night the boy will probably recover. He's putting up a remarkable fight, and every nurse and doctor in the place is fighting with him—in spirit, anyway. I don't say that his condition isn't desperate; but somehow I've the conviction that he'll make the grade."

Miss Columbine did not leave the hospital that night; nor did she close her eyes till early morning when a nurse appeared to say that Jack seemed to have turned the corner and his physician felt the worst was over. Not until then did the old lady cry a little, and the doctor ordered a powder that brought sleep. It was almost noon when she heard a rap upon her door, and Matthew Adams entered the room.

"Did I wake you, Miss Columbine?"

"No; I was only snoozing. How's everything now, Matt?"

The young man sat down on the bed and gazed at her.

"Jack is still naturally. Nancy isn't suffering this morning, and it looks as if the kids were coming through without a single amputation. That Osgood boy's been telling me what happened. I tell you, Miss Columbine, I take off my hat to Jack and Nancy—and to some of those brave youngsters too."

"I guess the papers didn't exaggerate this time," she observed.

"You're right. But just the same, I miss my guess if it's not some shock to those young relatives of yours when they read the story! How do you suppose it feels, Miss Columbine, to have the country regard you as heroic?"

"Well, it won't hurt either of 'em," responded the old lady. "They've got the Nelson common sense. It's who's likely to be puffed up, Matt. Think of the courage it must have taken for a boy to start out with the teeth of a storm, especially when the driver had disappeared. And Nancy! A girl brought up as she's been—everything soft and easy so far—to do what she did—Well, all I can say is that my pioneer mother would have been proud of her!"

Matt noted with pleasure that Miss Columbine spoke with her accustomed briskness.

"You must go home to-day, Matt," she said later. "It's been a comfort knowing you were here; but your father needs you, and I'll not be able to let them go."

The young man smiled.

"I've had orders per telephone, to stay on duty a day longer. Mark's on his way in from Prairie Ranch right now. Mother's coming down in the truck to take him home and incidentally, pick out a new car!"

That's one good thing came out of this blizzard, Miss Columbine, we're practically forced to buy a decent automobile. The old one's done for;

and even Dad can't rouse up an excuse to put us off. The Adam clan is thrilled at the prospect. We're to have a family reunion at the Ford garage this afternoon."

Miss Columbine laughed and said:

"Your mother deserves a modern car if anybody does. Is Mark all right again?"

"He'd come whether he was not. They've had to take turns sitting on him to prevent his getting out of bed! All that kept Mark from joining that rescue party, Miss Columbine was the fact that Aunt Elm hid his clothes, locked the closet, and Uncle Tom keeps his. I must run now and get a bite before I meet the family."

After this things went more smoothly, and the messages to Edgewood contained only the best of news.

All the Vitamins of COD LIVER OIL PLUS Bone Building MINERALS

Cod Liver Oil when digested supplies many necessary elements for proper growth of bone and bone. Scott's Emulsion of Cod Liver Oil and the Hypophosphites of Lime and Soda, prepared for easy digestion, insure proper and rapid bone development without the unpleasant taste of Cod Liver Oil.

that compact on the bureau, Mark. I expect I look a sight."

The young man threw her a reproachful glance as he obeyed.

"I note the fact that you used no powder or lipstick on my account, Miss Aladdin. Say! Aunt Elm sent in a big donation for the library. I left the books with Mary Taylor, but she suggested you might like to look 'em over here."

"I would. I can hardly wait to get back to the library. Juanita says—'All ready,eller,' called Matthew from below."

Mark went to the stairway and looked down.

"Why don't you join us, brother? Nancy's been beautifying herself just for your benefit. She looks like the Queen of Sheba or Greta Garbo, or some one."

Matthew obeyed, saying as he paused on the threshold: "I was only thinking that two callers might upset the invalid. How you feeling, Nancy?"

"Great! And don't call me an invalid. There's nothing the matter except that my feet feel sort of—well, sort of brittle!"

"Mark Adam," called Miss Columbine, "you come right down. You've been there half an hour. It's Mat's turn now."

"Coming," called Mark; and to Nancy: "I'll drop in later and let you know what I think of that girl. You're a good girl, my dear. So long."

As Mark departed, Matt drew a chair nearer the bed.

"You appear to be submerged in letters, telegrams and the daily press," he told her, smiling. "How does it make you feel, Nancy?"

Her eyes lighted with something near amusement.

"It may sound ungrateful, but most of this business makes me want to laugh. It's awfully nice for every one to say such things about us; but I know, and you know too, Matt, that anybody else would have done exactly what Jack and I did. It just happened to us—that's all."

"I'm not so sure," said Matthew gravely. "I think you're wonderful, Nancy."

(To Be Continued)

A Lightning Shave

Halluc. Claims Flash Deprived Him Of Moustache And Beard

It is certain that Luciano Codeppi had a beard and moustache and it is just as certain that after a thunderstorm he was clean shaven.

He says the lightning shaved him.

Here is his story:

Codeppi, a native of the village of Frascati di San Francisco, Italy, was leaning out of the window, watching the lightning flicker across the fields when a sudden flash sent him to the house, and threw him back into the room. When he put his hand to his face he found that his moustache and beard had disappeared.

Otherwise he was uninjured.

Have Efficient System

Mrs. Ruth Bryan Owen, United States minister to Denmark, is the record set up by Mr. and Mrs. M. Duncan, of Postay, Scotland. Duncan senior, also serves as a policeman for a number of years, but left the force, and took up farming. After leaving school in turn the seven sons tried to farm. Six of them are six feet and over in height, while the youngest, who is only 18, is five feet 11 inches.

The wood for umbrellas and canes is grown in forests of small saplings. These saplings require about four years to reach the right size.

A legal decision in Ontario, Canada, permits children of the province to go to school in their bare feet.

Man, they're good!

"There's a Christie Biscuit for every taste"

Bicycle With Wings

Short Flight Has Been Achieved By German Inventor

From Germany comes the news of the first flight ever achieved by man—just about. Since the immobile man has been trying to get into the air in various contraptions propelled by human muscles and the spectators at Frankford-on-Main saw a sort of winged bicycle actually leave the ground in a flight of several hundred yards.

So what? Does this preface to what we shall leap on our aerial bicycles and sail through space? The inventor says so, but we are inclined to doubt him. Terrestrial bicycles, if you recall, became somewhat less popular with the development of the gasoline engine. It would be great sport to go pedaling through the air, but when one can sit comfortably at the controls and let an engine do the work—well, somehow aerial bicycling seems less attractive. If it came to a choice between flying flivers and flying bicycles, we have a pretty good hunch which the public would choose.

—Detroit Saturday Night.

Tribute To Women

Share Largely In Contributions To Our Modern Civilization

Women's contribution to civilization has been a large one. No less an authority than Mary McLeod Bethune, the noted historian, claims the woman's hand built civilization. She points out that primitive woman was the cook and the guardian of the hearth, that women were the butchers, millers, harvesters, that they evolved the processes of spinning, weaving, dyeing, that according to one authority they even invented the suction pump and that they are credited equally with men with discovering the origin of fire. —Country Life in B.C.

All Have Same Idea

Seven Sons In One Family Serve On Police Force

A family of seven sons, and all in the police force, is the record set up by Mr. and Mrs. M. Duncan, senior, also serves as a policeman for a number of years, but left the force, and took up farming. After leaving school in turn the seven sons tried to farm. Six of them are six feet and over in height, while the youngest, who is only 18, is five feet 11 inches.

Space is not exactly crowded, considering a statement's statement that space unoccupied by stars is 100 million million million times as great as that the stars themselves occupy.

As late as 1900, English rustic caught rain water falling on Ascension Day. The water was bottled and used in each bread leavening to insure "light" bread.

The big ship also can carry pressure tanks for poison gas to be discharged over trenches at 250 miles an hour.

Pilgrim Visit Millions

A quarter of million pilgrims visit the Great War battlefields of France every year, and of these six per cent are German, twice as many as British. No fewer than 14,700 Germans visited Verdun alone during 1924.

As late as 1900, English rustic caught rain water falling on Ascension Day. The water was bottled and used in each bread leavening to insure "light" bread.

USE QUAKER NATURAL BRAN for baking...

BECAUSE Quaker Bran is natural bran, it mixes better, rises lightly and imparts that delicious real bran flavor to muffins, cookies, cakes and bread.

Quaker Natural Bran is more economical than prepared brands for baking—it's a splendid health food which supplies the bulk necessary to correct constipation easily and naturally.

Order Quaker Natural Bran today. See for yourself how it improves bran dishes—and how economical it is. There's a recipe folder and a valuable coupon in every package.

Mrs. C. C. Stafford, and her granddaughters, Misses Wilma, and Lois Thompson were in Calgary on Saturday.

Fred Baker was seen on the street early Monday morning with a double barrelled shot gun. Fred said he was on a collection tour.

Ed note—Fred if your plan works let us know and we will buy a couple of shot guns.

On Sunday last Premier Aberhart said during his broadcast, when I was teaching school and spreading the gospel through our institute I thought I was busy but since becoming Premier I realize that I was having a holiday then.

This is not the same man that was going to drive the brown rat out of his cushy job, must look a lot different from the inside.

Because a high official in the Prussian service fell asleep while listening to a radio address of Adolf Hitler dictator of Germany, he was immediately fired, we heard of something like this in Ed note days ago when a high official there was suddenly fired when he said he did not understand Aberhart's philosophy of a "just price" gott mit uns.

The First U.F.W.A. are putting on a novelty raffle and the draw is made during the evening of Oct. 30 on the occasion of their five hundred and contract bridge party, this raffle will consist of some twenty five prizes making a winner in every fifteen tickets and the tickets are being sold for 10c or 25c see your quarter ready when the ladies call you are sure to be a winner.

You will find the worth - while bargains advertised.

W. H. (Bill) Miller, who has not been feeling the best for some time now, was ordered to take a complete rest. This pretty tough for one so full of pep but orders are orders. Bill, you don't know how much you are missed and all are hoping for a speedy and complete recovery.

IT'S HERE! IT'S NEW!

A new brand makes its debut — and takes its place "in the sun," along with the other brands of

ALBERTA'S FAMOUS BEERS

E D E L W E I S S

... a Beer of superb flavor brewed—
from an old "Vienna Style" formula.
And like the beautiful Alpine flower
from which it takes its name — it is a
symbol of purity.

IT'S SMOOTH! IT'S RICH!

Try It Today

... in bottles only at your favorite hotel
or club ... or order a case direct from
our nearest warehouse at Calgary.
